FILET DROM KIT

Set up an effective solution against Sargassum

Procap, in collaboration with a fisherman, developed the Filet Drom solution. The net makes it possible to divert Sargassum to collection or storage areas at sea. The seaweed, trapped in the net, decomposes naturally in a few days.

- Visible out of the water for sailing
- Respect aquatic environments
- Easy to set up
- Does not block access to boats and beach craft

SOLUTION #1

Kit Filet Drom

Sold by the complete linear meter (nets, floats, netting, etc.)

SET IT UP YOURSELF

* Training on how to install the Drom net

SOLUTION #2

Filet Drom (Ready-to-use)

1. In-depth studying of the problem.
2. Supplying and installing the Drom Net on the necessary length.
3. Supporting and monitoring the proper functioning and its implementation for 10 days.
4. Maintenance possible according to demand.

DROM NET BUOYS ARE MADE BY PROCAP'S NEW EQUIPMENT!
